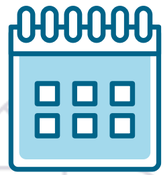
Introduction

QuickDOC is a mobile application designed to make doctor appointments simple and fast.

Saves Time

Specialist Doctors



Easy Appointments

Smart Access

⚠ Problem Statement

Long waiting queues

Manual booking and registration

Scheduling conflicts

Lack of proper reminders

★ Key Features

- Instant Appointment Booking
- 24/7 Access to booking, canceling, rescheduling
- Dynamic Slot Management
- Reminders & Notifications
- One-click Emergency Call
- Digital Health Records

Exceptional Feature

Dynamic Slot Management

- Prevents double bookings.
- Keeps doctor schedules accurate.
- Smooth, reliable booking process.

Challenges

In Development

Database Connection

- Problem: If the database is slow, patients may see wrong schedules and doctors may miss bookings.

Booking Time Slots

- Problem: Two patients trying to book the same time with one doctor.

Notification System

- Problem: Sending on-time reminders so patients don’t miss visits.

Business Model

$ponsorship Model

Benefits: Discounts, health rewards, sponsor visibility, QuickDOC revenue

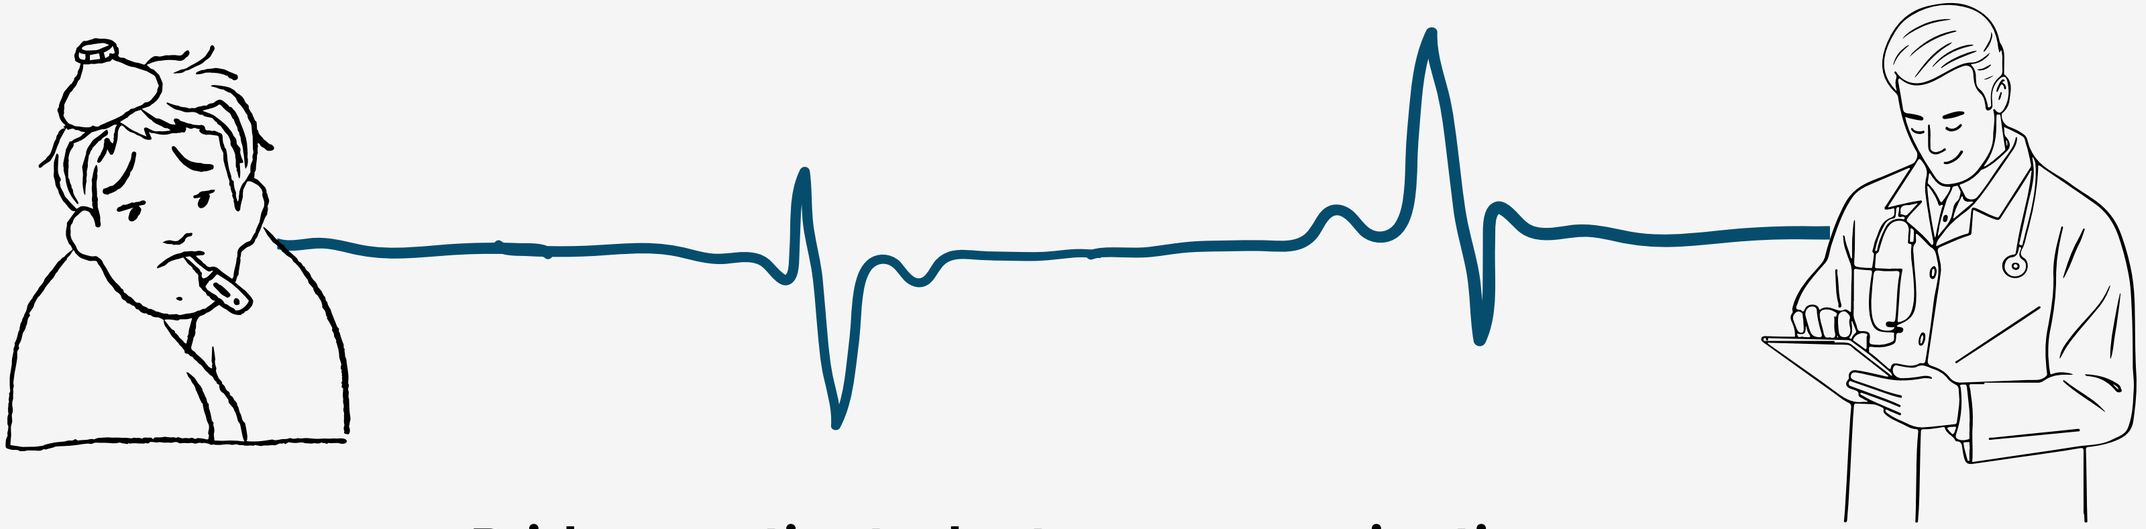
🚀 Future Improvements

- AI-powered doctor recommendations
- Telemedicine and video consultation
- Online payment and insurance claims
- Integration with wearable health devices
- Multi-language support for wider reach

Expanding QuickDOC for smarter, seamless healthcare

Conclusion

Quick Doc = Smart healthcare solution.



Bridges patient–doctor communication gap.

- Makes healthcare faster, easier & more accessible.
- Future-ready with scalable business model.

Thank You
